

DIN 6799 washers of small diameters must be mounted with the jaws designed for that purpose.

For an easier assembly, DIN 6799 washers are available for rods to be inserted into the assembly device so as to place the parts in the correct position. They can be clamped with

a jaw easily. Once the DIN 6799 washer is locked in the jaw, it can be easily placed without coming loose and without having to exert unnecessary effort.

Ø Washer diameter	Part Number	Box Quantity	Outer Box Quantity
1,5	03050267	1	1
1,9	03050274	1	1
2,3	03050288	1	1
3,2	03050299	1	8
4,0	03050300	1	8
5,0	03050317	1	1
6,0	03050322	1	1
7,0	03050330	1	1
