

These jaws are designed to apply DIN 6799 washers, as they are difficult to assemble by hand. The jaw clamps the DIN 6799 washer so that it is completely fixed, leaving no room for it to come loose. Besides, it can be done by applying with just the right amount of effort. Once the washer is on the jaw, it can be applied and placed where needed. Once the jaw is removed, the washer is fixed onto the shaft.

**MATERIAL:** Folk: Steel  
Handle: Plastic

Ø Nominal diameter	Part Number	L	S	A	B	C	D	Form	Color of handle	Box Quantity	Outer Box Quantity
