

The GRU Edge Clip is a fastener composed of two flaps in clip form which is mounted externally by applying pressure to both sides.

Some models incorporate a spike on the inside of one of the flaps which helps to ensure a good grip. In automotive applications these clips are used to fasten upholstery, mats and similar parts.

MATERIAL: Spring steel
HARDNESS: HRC 46 ÷48
FINISH: Anti-rust oil-dipped or zinc plated

| Part Number | Form | a ±0.1 | b ±0.2 | c ±0.3 | d ±0.3 | s ±0.05 | Box Quantity | Outer Box Quantity |
