

Multigrip rivets are used for joining all types of metallic materials as well as soft or combined materials. They are very versatile as they have a riveting capacity that adapts to multiple thicknesses in a single size. It has a high tolerance at the time of application as it adapts perfectly to the hole and half-seals to the material.

MATERIAL: Body: Aluminum Al Mg 2.5
Stem: A1K Steel

FINISH: Body: Polished
Stem: Zinc plated Cr3
