

## Plus professional general work Segmented - DGOPPS

Manual machine

This blade is perfect for dry cutting and suitable for cutting building materials that are not excessively hard or abrasive (construction brick, soft stone, masonry, cement tiles, ceramic tiles, concrete, etc.). It has a segmented blade, which stands out for offering great power, higher cutting speed and very good air cooling.

**MATERIAL:** Blade: synthetic diamond alloy and metal powder based  
Cobalt, Nickel and Iron

**USES:** Sheet: tempered steel  
Construction brick, soft stone, masonry, cement tiles, ceramic tiles, concrete

Part Number	Ø Exterior	Ø Inside	Blade size Width/Height	Blade Nº	RPM Max.	Quality	Box Quantity	Outer Box Quantity
