

Tabletop machine

This blade is perfect for wet cutting and suitable for cutting building materials that are not excessively hard or abrasive (construction brick, soft stone, masonry, cement tiles, ceramic tiles, concrete, etc.). It has a continuous band that is perfect for cutting sensitive and/or ceramic materials with great precision as it does not damage or break the material surface.

MATERIAL: Blade: synthetic diamond alloy and metal powder based
Cobalt, Nickel and Iron

USES: Sheet: tempered steel
Construction brick, soft stone, masonry, cement tiles, ceramic tiles, concrete

Part Number	Ø Exterior	Ø Inside	Blade size Width/Height	RPM Max.	Quality	Box Quantity	Outer Box Quantity
