

Tabletop machine

This blade is perfect for wet cutting hard materials and suitable for construction components such as ceramic clay, porcelain clay, klinker, fire brick, reinforced concrete, flint, fibrocement, hard tile, etc. Its MAX blade stands out for being laser-welded, offering great power, a very clean and linear cut, higher cutting speed and very good air cooling

**MATERIAL:** Blade: synthetic diamond alloy and metal powder based  
Cobalt, Nickel and Iron

**USES:** Sheet: tempered steel  
Ceramic clay, porcelain clay, klinker, fire brick, reinforced concrete, flint, fibrocement, hard tile
