

This band clamp is made of stainless steel and covers more than 30 diameters. It is preformed (semi-assembled) so that if the diameter of application is known, it is only necessary to choose the measure closest to such diameter and tighten it using a tool designed for applying this type of clamps. It can be tightened as much as desired and then cut.

MATERIAL: W4 AISI 304
Stainless Steel
CORROSION RESISTANCE: 400 hours Salt Spray (ASTM B-117)
