

These gloves are made of non-slip green acrylonitrile, without liner, have a long cuff and an internal cotton flocking. The length of the glove is 33 cm, the thickness is 0.38 mm and the cut is straight. They have very good resistance to abrasion and solvents, which is why they are especially suitable for handling solvents, paint and alcohols. They are recommended for the paint and varnish industry, chemical and petrochemical industry, graphic and printing industries.
