

Professional tubular electric dispensing tool

The professional electric tubular dispensing tool has an Ion Lithium Battery 7,4V-1,3A, a force of 250kg/f and works at a speed of 6,9 mm/sg. The total weight of the tool including the battery is 1350 grams, meaning that it is light and easy to use. It also has a drip-proof system, variable speed control and an LED light for use in poor visibility applications. Case and battery charger are included.
