

The eye/eye swivel is especially suitable for applications requiring opposite directional movements between both ends in order to lift loads, transport or lash elements, as the eye/eye swivel avoids that the chain or rope get twisted.

TIPS: In order not to compromise safety, the Safe Working Load (SWL) established for each size must never be exceeded.

MATERIAL: Steel C45
FINISH: Zinc plated

Size D Ø	Denomination	Part Number	L1	H	H1	Workload W.L.L (kg)	Box Quantity	Outer Box Quantity
