

# Round wire rope thimbles

The wire rope thimble is an essential element to protect the wire from any kind of friction.

The perfect alignment and the absence of fissures on the edges, as well as the depth of the groove, guarantee the perfect seating of the wire.

TIPS: The quality of the steel of the wire rope thimble guarantees the wire is protected in the moment of the maximum traction.

**MATERIAL:** Steel C15  
**FINISH:** Zinc plated
