

# Carbon steel lifting hook with safety latch

The quality of the latch-activating spring makes it fast to operate without altering the safety level required by the process of lifting or moving loads. Each hook is marked with its working load in tonnes and with the material-identifying symbol: (C) for carbon steel hooks and (A) for alloy steel hooks, guaranteeing the correct choice.

TIPS: In order not to compromise safety, the SWL established for each hook must never be exceeded.

**MATERIAL:** Carbon steel  
**FINISH:** Hook: Red  
 Dock and safety lock: Zinc plated
