

Thanks to their articulated design, chain links used to lift or transport elements, structures or heavy devices can be assembled and disassembled, and even extended, very quickly and efficiently without the need for special tools. The stability of the fastening is guaranteed by the excellent functionality of the lock acting as a retainer in the central part of the pin and as a stop against the two inner walls of the articulation.

MATERIAL: Grade 80 alloy steel
FINISH: Red

TIPS: In order not to compromise safety, the SWL established for each size must never be exceeded.

Chain size Ø (mm)	Denomination	Part Number	B1	D1	H1	H	ØE	Workload W.L.L (kg)	Box Quantity	Outer Box Quantity
