

The DIN 911 long Allen key is a tool that is used to effectively thread all kinds of screws that have a hexagon socket in the head adapted for the insertion of the key. It is a spanner whose model has a much longer arm than its standard analogue to make it possible to reach into hard-to-reach spaces.

The L-shaped design allows leverage during tightening to promote higher torque. The elbow of each spanner is 90 degrees. The entire structure of the spanner is hexagonal. The spanners are manufactured in accordance with DIN 911.

**MATERIAL:** Chrome vanadium steel  
vanadium 58CrV4 (1.8161)  
**FINISH:** Blued  
**HARDNESS:** According to size  
(52 HRC - 50 HRC - 48 HRC )
