

## Interior lashing strap for trucks

The interior lashing strap is the ideal solution for safely securing loads inside vehicles thanks to the E-track end fittings. The use of this lashing strap prevents the uncontrolled movement of goods while the vehicle is in motion and protects them from impact, friction damage and vibration. The risk of injury to drivers and employees is also minimized.

**MATERIAL:** 100% Polyester band  
Steel ratchet and hook

**FINISH:** Zinc plated metal parts

**STANDARD:** EN12195-2
