*Never Stop*

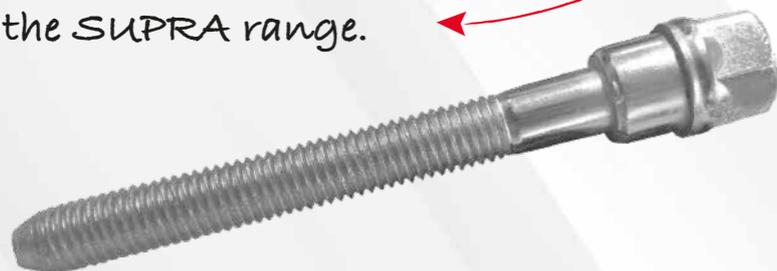

# STRONGER THAN EVER BEFORE

According to  
EU 2002/95/EC.

Bolt specially designed  
and manufactured for  
the SUPRA range.

The swivelling bridge allows Supra  
Clamps to be opened up completely and  
helps to avoid deformation of the clamp  
during assembly.

Three or four  
spot-welds with  
protuberances  
guarantee an  
excellent  
response when  
high torque  
ratings are  
applied.

Revolutionary  
lug design  
which prevents  
components  
from becoming  
dislodged.

Bevelled edges  
prevent damage  
to the tube or  
hose.
